

Preparing for Aging Parents Workshop

Your parents' health and safety should never be an afterthought; your best decisions are rarely made under pressure of an emergency. Whether the time is now or somewhere down the road, this workshop is designed to give you information to make your best decisions regarding medical care, care coordination, senior living options and financial protection strategies.

- **“My Mom’s needs are becoming harder to manage after her stroke; how can we get her the best care and protect her assets?”**
- **“My Dad is getting out of the hospital; what services are available for him at home?”**
- **“How will I know when it is time to make the move to senior living?”**
- **“I am my parents’ caregiver and take care of their finances. Both of them have significant needs and I am overwhelmed. What are my options?”**
- **“How much will senior living cost and what is included?”**
- **“My Mom is more and more forgetful due to her dementia; what are the options for her care?”**
- **“My parents are starting to age; are we prepared for down the road?”**

The workshop is presented by:

NVNA and Hospice Elder Living Advisors Senior Resource Center Inc.

Wednesday, October 2, 2019
